

PACKAGING

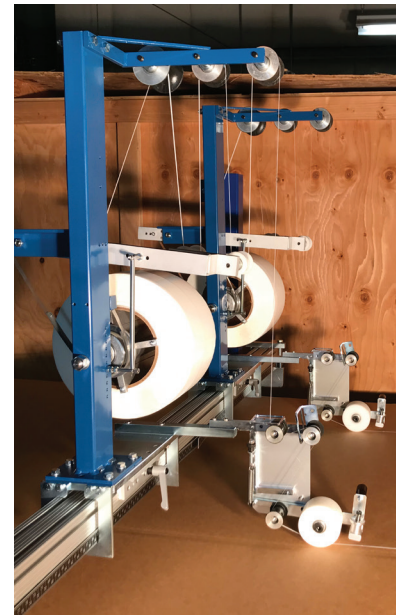

Dry End Tape Applicator

Designed for maximum efficiency on Sesame® film tape operations.

H.B. Fuller's Dry End Tape Applicator is designed to dispense our product effectively on the surface of the running web. Each unit monitors and adjusts tension based on the line speed of your process. This easy-to-install and user-friendly applicator can provide production efficiency and a business advantage.

- **Efficient tension control:** An independent braking system monitors and applies optimal pressure to control tension.
- **Long-lasting and flexible:** Designed for heavy industrial use with custom parts that are resilient in high-heat and high-speed environments. It can also be configured to run other products.
- **Easy installation and worry free:** All of H.B. Fuller's equipment is installed and maintained by our technical specialists.
